

SITUATION:

HH consists of mom and dad. Both parents are undoc and dad is employed. He has both earnings and hours in the sample month.

QUESTION:

Do we code the hours of the undoc as well as the earnings?

ANSWER:

This family does not have a WTW participation requirement; it is a child only case. Employment data is not entered on such cases. Our instructions from the feds are to code employment status in T47 for these T30 code 2 parents and to leave it at that. This will cause an edit. The edit states that if a person is T47 employed, then employment data must be entered for them. That edit is being revised and will be changed with in an upcoming version of Q5i. For now, force the data. There is no place to enter income or hours for undocumented alien parents either as such or as income deemed to the children.
